

Aldosterone and aldosterone antagonists in cardiovascular and renal protection

Odense 14. september 2010 15-18.30

Program

Markus Bleich, Univ of Kiel

“Integrated role of aldosterone for cardiovascular homeostasis-lessons learned from mice with targeted deletion of the mineralocorticoid receptor”

Per Løgstrup/Hans Ibsen

“Primary hyperaldosteronism”

Peter Rossing, Steno Diabetes Hospital Copenhagen

“Aldosterone antagonism for renal protection in diabetic nephropathy”

Maria Laijer, Steno Diabetes Hospital, Copenhagen

“Aldosterone synthase polymorphisms: impact on prognosis and treatment”

Shorter presentations of ongoing projects

Ib Abildgaard Jacobsen, Odense University Hospital

“Effect of spironolaktone on treatment-resistant hypertension in type 2 diabetes”

Lene Boesby, Dept Nephrology, Herlev Hospital

“Aldosterone blockade in non-diabetic chronic kidney disease”

Finn Thomsen Nielsen, Dept. of Nephrology, Rigshospitalet, Copenhagen

“Effect of aldosterone antagonists on blood pressure and kidney function after cyclosporine treatment”

Jeppe Schjerning, Dept. of Cardiovascular and Renal Research, Univ of Southern Denmark, Odense

“Dual effect of aldosterone on vascular contractility”

Anette Dam Fialla , Dept of Cardiovascular and Renal Research, Univ of Southern Denmark, Odense

“Aldosterone antagonists and liver fibrosis-a new indication?”
